

Conti Hybrid

Driving regional transport into the future.

GENERATION 3. DRIVEN BY YOUR NEEDS.

Conti Hybrid HS3 / HD3 / HT3 (19.5")

The ever-increasing demands of today's transport market require a new level of versatility for commercial vehicles. The new Conti Hybrid is the perfect tire solution. With the highest mileage performance and excellent fuel efficiency, it is equally at home on city streets, motorways and uneven roads. Through its new technical features that help you achieve your lowest overall driving costs, the comprehensive, cutting-edge tire line Conti Hybrid is redefining regional, mile after mile after mile.

The new Conti Hybrid is ideal for mixed applications in regional distribution up to 16 t, e.g.

and many more ...

ContiLifeCycle inbuilt

Continental's premium casing, with Air-Keep inner liner, triangular belt and bead with steel cord chafer, guarantees high retreadability. The new regrooving indicators make regrooving faster and easier. The Hybrid tire line is perfectly tailored to our ContiLifeCycle.

GENERATION 3. DRIVEN BY YOUR NEEDS.

Product highlights

› **The two-layer tread construction:** combines high mileage performance in the cap compound with significant rolling resistance improvements in the base compound

› **Plus Volume Pattern:** narrowed groove widths result in increased pattern volume which improves wear resistance to guarantee high mileage performance

› **Wet performance pocket sipes:** a new siping technology with full-depth sipes enhances water displacement and improves wet performance over lifetime

› **Two-layer tread construction:** combines high mileage performance in the cap compound with significant rolling resistance improvements in the base compound

› **Chamfered Edge:** the Chamfered Edge reduces deformation amplitude in sidewall and bead area which results in improved rolling resistance and helps lower fuel consumption

› **Hybrid Compound:** the advanced application-optimized tread compound adds up to significant improvements in rolling resistance and mileage

› **Rolling resistance sidewall compound:** the polymers selected for the new rolling resistance compound provide more flexibility between the polymer chains. This results in reduced friction and therefore lower rolling resistance
