HDL2 Eco Plus

Product Technical Features

Fuel Savings

- Superior rolling resistance thanks to the well established Eco-Plus technology: Intelligent interplay between casing and tread for light running data
- Rolling-resistance optimized tread pattern and compound
- Optimized tyre weight
- Air-Keep inner liner to maintain proper inflation pressure for long

Increased Mileage

- Optimized tread pattern with up to 15% more tread volume
- Optimized layout for more even frictional energy distribution
- New Triangle Belt for increased stability and less deformation
- Increased structural durability through steel cord chafer
- Up to 20% more mileage on drive axles

Retreadability

- Steel cord chafer, Air-Keep inner liner and new Triangle Belt for best casing value retention

Product Benefits

HDL2 Eco Plus

- Long haul drive tyre
